

Ali Alp Özer

AI Engineer

Munich, Germany alialp@live.com alialpoezer.github.io github.com/AliAlpOezer linkedin.com/in/alialpozer

I build agentic systems, retrieval pipelines, and interfaces that make complex work usable. Before focusing on applied AI, I spent over three years developing enterprise software at Flexus AG, from backend architecture to the fleet-management cockpit.

EXPERIENCE

Software Developer and Technical Product Manager · Flexus AG

Mar 2023 - Jul 2026

Würzburg, Germany · Intralogistics Hybrid Fleet Manager

- Designed the SAP CAP backend, data models, and query APIs across SAP HANA and PostgreSQL.
- Built fleet-routing business logic and owned the SAP UI5 fleet-management cockpit.
- Shaped the cockpit's user experience and roadmap for an SAP Innovation Award-winning application.

SELECTED PROJECTS

Streamline

Industrial water planning · React

Visual workspace for mapping water flows, assessing reuse opportunities, and comparing proposed scenarios. Team second place at the Munich EIT Water Hackathon; individual third-place student award.

Munich Apartment Agent

Autonomous agent · Python, LangGraph, SQLite

Runs on a three-hour schedule to find and assess housing listings. Durable checkpoints, evaluation, and heartbeat reporting make unattended operation observable.

Sage

Retrieval and evaluation · Python, Qdrant, RAGAS

Built a retrieval pipeline over 185 documentation pages, with a hand-labelled golden set and a longitudinal evaluation baseline.

Voice Scheduler

Voice agent · TypeScript, MCP, SQLite

German-language booking agent with speech input and output, a bounded tool loop, and separate adapters for restaurant and medical-practice workflows.

EDUCATION

MSc Wirtschaftsinformatik · Technical University of Munich

From Oct 2026

BSc Wirtschaftsinformatik · University of Würzburg

Apr 2021 - Sep 2024

TECHNICAL STRENGTHS

AI systems

Agent orchestration, tool calling, retrieval, evaluation harnesses, MCP

Engineering

Python, TypeScript, JavaScript, SQL, FastAPI, React, SAP CAP, SAP UI5

Data & delivery

Qdrant, PostgreSQL, SQLite, SAP HANA, GitHub Actions, Linux
